DATA ANALYST

- Experienced Data Analyst with 5+ years in FinTech and banking, specialising in SQL-driven financial crime analytics, transaction monitoring, and dashboarding for leading institutions including Bendigo & Adelaide Bank and Remitano. Dedicated to leveraging advanced analytics, machine learning, and AWS-based ETL to solve complex business problems—reducing false positives, optimising costs and performance, and automating SMR and marketing workflows—while also building data tools for the community as a hobby.

KEY SKILLS

Advanced Analytics: (SQL, Python, R)	- Fine-tuned scenarios utilising optimization algorithms & statistical calibration achieving 60-70% true positive rates, 67% alert reduction - Engineered SQL-based interim monitoring maintaining 100% continuity across 2M+ transactions - Designed recursive SQL for 150K+ MLM relationships reducing payout calculation complexity, eliminate graph database dependency - Built vendor-agnostic SQL scenarios processing 150+ alerts daily with 99.9% data integrity - Replicated 40+ transaction monitoring scenarios in SQL for assurance & 100% logic alignment during Adelaide Bank migration
Visualization: (PowerBI, Metabase)	- Engineered Power BI dashboards eliminating 70% frequent ad-hoc requests, reducing prioritization time 60% - Delivered 100% on-time analytical reports/dashboards with 8/10+ satisfaction
Regulatory Reporting: (SQL,LLMs, Python, NLP)	Automated AUSTRAC reporting pipeline with SQL, Python, NLP and LLMs reducing report prep time 80% and enhancing quality of reporting.
LLM & Agentic AI: (SQL,LLMs, Python, Vector DB)	Extracted 156 AUSTRAC docs into 198 typologies & 300+ indicators using Agentic AI & advanced ETL
Predictive Analytics & ML: (Python, PySpark, Scikit-learn)	Automated email marketing via customer classification driving 30% CTR uplift
Data Engineering & ETL: (Redshift, AWS Glue)	- ETL optimization reducing developer workload 30%, cloud costs 30%, dashboard runtime 70% - Built vendor-agnostic scenarios + automated workflows processing 150+ alerts daily (99.9% integrity)

PROFESSIONAL EXPERIENCE

Analyst	Bendigo & Adelaide Bank	05/2021 - Present
<i>Intelligence and Analytics - Financial Crime Risk</i> <i>Australian banking group with 4 commercial banks and 1 digital bank under management</i>		
- Managed the transaction monitoring analytics function: - Responded to reporting requests - Managed the design, development, and maintenance of Power BI dashboards for alert prioritization and operational/alert KPIs in transaction monitoring analytics, serving operations, transformation, and governance teams - Provided advanced analytics support to operations, compliance, and assurance teams. - Provided interim analytics solutions for transition and transformation		

- Developed automated solutions utilising analytics capabilities
- Implemented remediation solutions using advanced data transformation techniques
- Managed and transformed financial crime risk analytics capabilities
- Built and fine-tuned transaction monitoring scenarios with statistical and machine learning techniques
- Built data-driven solutions for operations and compliance
- Researched and developed machine learning and NLP solutions for transaction monitoring exploratory analysis and predicting SMR-triggered alert sets.

ACHIEVEMENTS

- Led the establishment of an interim fraud and AML transaction monitoring function during Bendigo Bank's exit from DELPHI and transition from TechOne, engineering advanced SQL-based detection queries to maintain **100% monitoring continuity** across **2M+ transactions** with **zero compliance breaches**.
- Co-designed and automated the regulated **UAR-to-SMR (Unusual Activity to Suspicious Matter Reporting)** pipeline using Selenium, Large Language Models (LLMs), data masking, and SQL data modelling, reducing regulatory reporting preparation time by **80%**.
- Developed and fine-tuned new transaction monitoring scenarios for Child Exploitation, Sextortion, Drug Trafficking, and Terrorism Financing typologies, leveraging genetic algorithms, statistical calibration, and trend modelling to achieve **60–70% true positive rates** with a **67% reduction** in alert volume.
- Designed and implemented an AI-driven typology and indicator management platform, applying NLP and advanced ETL in SQL to extract and transform **156 AUSTRAC documents** into **198 actionable typologies** and **300+ actionable indicators**, forming the foundation for a modern data-led monitoring framework.
- Built complex SQL & Python-based transaction monitoring scenarios outside vendor platforms and engineered automated daily workflows to feed alerts alongside internal SMRs into vendor systems—processed **150+ alerts daily** with **99.9% data integrity**, eliminating manual transfers.
- Led the annual transaction monitoring performance review, applying statistical confidence testing, data sampling, and SQL-based scenario recalibration to reduce false positives by **5%** and remove **5,000+ unnecessary alerts annually**, saving **300+ investigation hours annually**.
- Engineered SQL-based replication and assurance testing of **40+ transaction monitoring scenarios** for the Adelaide Bank to Bendigo Bank migration, employing advanced validation queries and transformation logic to achieve **100% scenario alignment** and seamless model transfer.

Data Analyst

Remitano

03/2020 - 04/2021

International cryptocurrency exchange which matched \$500M+ trading value and operating in more than 30 countries.

- Handled all data analytics requests, delivering dashboards and diagnostic reports using Python, SQL, and Metabase.
- Built marketing predictive models to automate and optimize strategy deployment.
- Designed, developed, and managed data crawlers, ETL pipelines, and Redshift database structures.
- Collaborated with engineering teams on complex SQL-based data transformations for scalable operational and marketing analytics.

ACHIEVEMENTS

- Automated email marketing via customer classification models (Python/SQL), boosting click-through rates by **30%** and enabling scalable campaign personalization.
- Optimized ETL pipelines, indexing, and data normalization in Redshift, slashing developer workload by **25%**, cloud costs by **30%**, and dashboard runtime by **70%**.
- Delivered **100% on-time** analytical reports and dashboards with consistent stakeholder satisfaction scores of **8/10 or higher**.
- Engineered complex SQL solutions (including recursive queries) for MLM commission calculations, processing **150K+ referral relationships** across **4 levels**—reduced payout computation complexity, eliminating graph database out of pocket cost and powering a **4-tier referral program** that drove **25%** of new user growth.

Investment Associate

National Citizen Bank

09/2014-02/2018

National Citizen Bank – A Commercial Bank with more than 20 years of operation

- Built financial models for property project estimation, company valuation and debt restructure planning and pre-

senting these materials to Investment Council for investment recommendations.

- Coordinated with in-house executives and clients in lending due diligence and gathering business information for financial analysis and valuation.

ACHIEVEMENTS

- Approved **80%** of investment recommendations by Investment Council that generated performance of public equity portfolio **CAGR 10%** thanks to field-tested financial data analysis skills & experience in public equity market.
- Reduced time for investment approval by **72 hours** and eliminated major conflicts in the investment process by composing the investment procedure with detailed instructions for accounting journal entries, authority level and document revision.

HONORS & AWARDS

- Third place & Honorable Mention - Project SafeAus - Making Australia safer, Team VAIT - GovHack Australia, 09/2021
- #13 in public test and #32 in private test - Pet finder Competition, Team Vicohub-1 – Kaggle, 02/2019-03/2019
- First prize & Runner-up - Programming Competition – Department of Education and Training – 2007, 2008 & 2009

PROFESSIONAL QUALIFICATIONS

- CFA Level 1 Passed – CFA Institute, 2013
- Google Cloud Platform Big Data and Machine Learning Fundamentals – Coursera, 2020
- Modernizing Data Lakes and Data Warehouses with GCP – Coursera, 2020
- Building Batch Data Pipelines on GCP – Coursera, 2020

EDUCATION

- Master of Business Analytics – Deakin University, 2019
- Bachelor of General Business Management – National Economics University, 2013

VOLUNTEER ACTIVITIES & HOBBIES

- Tutored 100+ students in SQL and Python
- Won 2 Open Gov hackathon prizes
- Served as Coordinator of CFA Vietnam volunteer team
- Hobbies: Sports (Football/Soccer, Powerlifting), Building data-driven solutions for micro-businesses
